

 The turf and trees are always greener on the Jones side of the street!

## eTree and Turf Tips

### Don't Give up on the yard just yet!

September 2006

There are still several things to do to prepare your yard for winter:

- **Season's End Lawn Care Special!**

Choose from the following;

1. Sprinkler system blow out
2. Aerate and over seed the lawn to help fill in thin spots and thicken turf density
3. Winterizer lawn fertilizer application for those who are not on the Meister Lawn Care program

Save 25% by combining 2 or more of the above services to get your lawn ready! Call today for an estimate!

- **Fall Deep Root Feed Trees and Shrubs!**

It's been a long, hot summer and many trees and shrubs are stressed. Root feeding helps replace depleted essential nutrients and provides air channels for water and air to penetrate the soil.

Call today and take 25% off your order!

- **Winter Grass Mite Control**

Last winter was terrible for grass mites. Dry, warm weather set the stage for these pests to damage lawns. Be proactive and sign up for our winter turf mite protection program. 4 applications December through March.

Prices start at \$45.00 per application depending on the size of lawn.

- **Winter Tree and Shrub Watering Service**

Regular winter watering is essential for trees and shrubs. If you don't feel like dragging the hose around hire us to do it! We provide the truck, water, labor and add in wetting agents to help the soil absorb water. A thorough watering once a month November through March is recommended. Call us today to get on the schedule!
