

The turf and trees are always greener on the Jones side of the street!

E tree and turf tips

Too Dry Once Again

For a while fall looked to be off to a good start with moisture. A couple of fair snows in October supplied needed moisture, especially after the rush to blow out the sprinkler systems. November has been another story. What is supposed to be our 2nd snowiest month is not panning out. As such, the soil is drying out fast. Don't let a few inches of dry snow fool you into thinking the ground is moist. It's not! It's time to drag out the hose and start watering on the sunny days!

If you don't feel up to the task give us a call. Deep root watering for trees and shrubs starts at just \$90.00.

We supply everything: the water along with wetting agents, the truck and man power to get the ground moistened up.

It's critical to keep evergreens, especially spruce watered year round!

- **Winter Grass Mite Control**

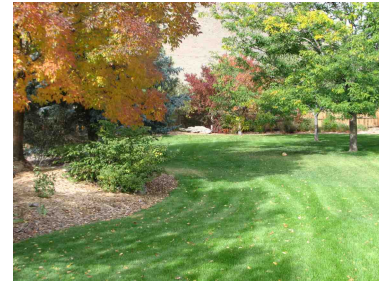

We are off to another dry winter which is perfect conditions for grass mites to damage your lawn. Turf mites are nothing to mess with. They will kill off the lawn! Be proactive and sign up for our winter turf mite protection program. 4 applications December through March.

Prices start at \$45.00 per application depending on the size of lawn.

- **Now is the time to Trim Trees!**

Dormant season pruning is our favorite time to trim trees! The entire structure of the tree is visible with nothing hidden behind foliage. One question that is frequently asked is how can we know what is dead when all the leaves are off? To the trained eye dead limbs are easy to spot. Shrunken and missing bark, no buds and no flexibility all indicate dead wood. When you have been caring for trees for as long as we have spotting dead wood is second nature. We also guarantee that if we miss any dead wood 1" diameter or larger that shows up in the spring we will return to prune it out at no charge.
